SUMMARY

- Full-stack engineer with 2+ years experience building high-traffic web applications using Python, TypeScript, Django, and React/Next.js.
- Skilled in scalable backend systems, responsive UI, cloud deployment (AWS, Docker), and web scraping.
- Active competitive programmer with strong problem-solving and algorithmic thinking.

EXPERIENCE

- **RoastNest [Website]** April 2025 - July 2025
Backend Engineer Remote, Intern
 - Built backend infrastructure with RESTful APIs, integrating 3+ third-party services to extend core functionality.
 - Created and managed GitHub Apps for feedback and authentication workflows, while ensuring database reliability with zero downtime.
 - Contributed to frontend development with Next.js, improving user experience and reducing page load time by 20%.
- **Sergul Computer Institute [Website]** Sept 2024 - Feb 2025
Fullstack Developer Remote, Freelance
 - Delivered a platform now supporting 2000+ active users.
 - Developed backend for admin panel to manage student data and daily operations.
 - Built and maintained the frontend, deploying the application on GoDaddy (cPanel).
 - Implemented SSL security with Certbot and managed certificate renewals.

PROJECTS

- **Blog21** GitHub
A full-stack Blog Web Application with user authentication, deployed using Docker for containerization.
 - * Developed models, templates, and user authentication, Deployed using Docker for containerization.
 - * Stack Used: Python, Django, Jinja, Docker
- **Padhle Bhaiii (1000+ Users)** GitHub Deployed Link
A note-sharing platform for students with responsive UI, OAuth authentication, and data management.
 - * Built with secure OAuth 2.0 authentication system with responsive design, serving 200+ active student users.
 - * Implemented efficient state management using Redux and optimized note sharing workflows.
 - * Stack Used: React, Supabase, TailwindCSS
- **Commodity Management Backend** GitHub
A backend server for product management with token-based authentication.
 - * Developed product management with token-based authentication, defining user groups with varied permissions.
 - * Stack Used: Python, Django Rest Framework, REST API

SKILLS

- **Languages:** Python, JavaScript, TypeScript, C++, SQL
- **Web Technologies:** Django, FastAPI, Selenium (Automation), Node.js, React.js, Next.js, Express.js, TailwindCSS
- **Database Systems:** PostgreSQL, MySQL, MongoDB, SQLite
- **Cloud & DevOps:** AWS, Docker, Git, GitHub, Linux, GitHub Actions, CI/CD
- **Other Tools:** Postman, Prisma, Knex, ngrok, pytest, BeautifulSoup (Web Scraping)

EDUCATION

- **KIET Group of Institutions - AKTU** 2022 - 2026
B Tech, Computer Science Delhi NCR

LEADERSHIP, ACHIEVEMENTS, AND VOLUNTEERING

- Led the team and **won the first Hackathon** organized by FOSSCU-K
- Volunteered in Backend Development and served as Outreach Lead at FOSSCU, an Open-Source Community
- Contributed in 5+ Open-Source Projects.
- Solved 250+ DSA problems using object-oriented programming languages. [Competitive Programming Portfolio](#)
- Participated in **HackCBS 6.0** Hackathon and won multiple tracks
- Got accepted in **Solana's Turbin3 Q4**, a cohort focused on blockchain development with Rust programming language in the Solana ecosystem
